

**Product Announcement
Seanet Pro v2.25 (590)**

Document Ref: 0706-TNS-00001

Rev. 01, 1st Feb 2023

**Release of an Update to the Tritech Seanet Pro Software
for the Support of SeaKing V7 Sonars and Bathymetric Sensors**

Tritech have released an update to their Seanet Pro software suite to allow the full support of the SeaKing V7 series Dual Frequency Sonars and Bathymetric Sensors. The latest release version for Seanet Pro is now:

V 2.25 Build 590 (19-01-23)

This release of Seanet Pro incorporates some performance and communication improvements as well as all previous feature updates and bug fixes.

This minor update does not affect the operation of Seanet Pro for existing users, and Tritech recommend all customers update their software installation to ensure it remains current to the latest release. **Customers using series V7 Bathymetric Sensors and Sonars with ARCNET communications cards should update their systems with immediate effect.**

The software update is available from:

- The Tritech website www.tritech.co.uk.
- The Tritech Software and Manuals USB stick **rev 13** and above.

For any queries regarding this notice please contact Tritech through your usual sales and support channel, or directly via email to support@tritech.co.uk.
