

Teledyne CT sensor obsolescence

We will hold limited stock of this part however due to the pending obsolescence of the **Teledyne CT sensor**, Tritech will be unable to source this part after the **31st December 2019**.

Tritech will continue to support the original SeaKing 704 Bathy, retired on 01/06/2019, by offering a **Product Rework Option (PRO)**.

Tritech will utilise elements of the customer supplied Seaking 704 Bathy in the factory build of a fully calibrated Super SeaKing 704 Bathy.

This offer only applies to a Teledyne CT failure within a Bathy where the Bathy or Teledyne CT sensor, fitted by Tritech, is less than 5 years old at the time of return for service.

The new Super Seaking 704 Bathy utilises the **RBR CT** sensor, offering improved reliability and increased performance.

Tritech will offer **60% discount** on the list price of a new **Super SeaKing 704 Bathy**, utilising the pressure sensor from the Bathy returned for service.

The Super Seaking 704 Bathy will be supplied fully calibrated and with a **1 year warranty** on all new parts utilised to build the replacement Super Seaking 704 Bathy.
